

Ultrasound Reporting & Image Management

ACCELERATE WORKFLOWS. DRIVE PRODUCTIVITY. ENHANCE CARE.

- ✓ Leverage automated, intuitive features while reducing errors and liability
- ✓ Generate customized, comprehensive reports while increasing referrals and patient volume
- ✓ Improve collaboration and communication while improving employee satisfaction and retention

Manage ultrasound studies in one seamless application for reports and images, built in a centralized, secure cloud environment.

Comprehensive Reporting

- Standardized documentation made simple
- Faster report completion & quicker access to information
- Automate key terms & actions with custom dictionaries & templates

Streamlined Viewing

- Easy-to-read, structured format links directly to ultrasound images
- Unique interface removes endless toggling & multiple windows
- Comprehensive DICOM image management

Powerful Data Tools

- Intelligent data mining & statistical analysis
- Comprehensive library of custom reports
- Easy data entry & review

Enhanced Billing Capabilities

- Auto-drop CPT & ICD-10 codes to satisfy orders & charges in your EHR
- Improve charge reconciliation & reduce rejected insurance claims

Seamless Integrations

- Vendor-neutral interfaces built with ease across modalities
- Effortless, secure communication between any HIS, RIS, PACS, & EHR

Superior Customer Support

- Fast, reliable day-to-day support delivered on-demand
- Detailed project coordination & implementation plans
