

# Cloud Ultrasound Reporting & Image Management

Cloud ultrasound reporting and image management from AS Software is uniquely built for your specialty. It gives sonographers and physicians the ability to work from anywhere, anytime; access ultrasound studies quickly; and create more detailed, quality reports in less time, with less effort.

## A cost-effective, smarter solution for healthcare organizations of all sizes.

✓ Innovative Accessibility

✓ Increased Efficiency

✓ Advanced Data Security

✓ Cost-Effective

✓ Quicker Deployment

✓ Enhanced Collaboration

## Upgrading to a cloud-based platform for your ultrasound practice improves efficiency, collaboration, and data security while reducing operational costs.

- Reduce the risk of downtime and data breaches
- Ensure compliance with healthcare regulations
- Eliminate the need for expensive IT infrastructure
- Streamline the reporting process and access studies on-the-go
- Eliminate budget requests when adding headcount

### Hardware Change Improvements

- Eliminate the need for server upgrades
- Remove licensing costs
- Reduce system maintenance
- Eliminate storage migration

### Benefits for your IT Department

- Fewer IT burdens
- Rapid feature updates
- Eliminate workstation installations and transfers
- Improve scalability – add new sites in hours, not days
